

ISLAMORADA, VILLAGE OF ISLANDS, FLORIDA

**ADDENDUM NO. 1
CLARIFICATION TO**

**REQUEST FOR QUOTATIONS
PROFESSIONAL CONTRACTOR SERVICES FOR WASTEWATER
SYSTEM
(18-02)**

ISSUE DATE: January 17, 2018

This Addendum forms a part of the Request for Quotations (RFQ) and clarifies the original Request for Quotations. Clarifications do not cancel any other portion(s) of the RFQ, including other portions of affected Sections listed below, unless otherwise noted.

The RFQ is hereby clarified as follows:

IV. SCOPE OF SERVICES

Question: With regards to the RFQ, are you looking for design services from a professional engineer for these services or just construction related services?

Answer: Islamorada, Village of Islands (the “Village”) is seeking to establish a library of contractors to provide wastewater repair and maintenance-related services in support of in-house collection and transmission system operations and maintenance. The collection and transmission system is primarily a vacuum system that includes grinder pumps to enhance flow. Going through the bid process now will minimize or eliminate the need to do so on a case-by-case basis when needs arise. These services normally include pump outs, plumbing repairs, electrical work, and other construction/repair services. Engineering design services are not included in this RFQ; the Village already has a library for these services.
