

ISLAMORADA, VILLAGE OF ISLANDS, FLORIDA

ADDENDUM NO. 2 CLARIFICATION TO

REQUEST FOR QUOTATIONS PROFESSIONAL CONTRACTOR SERVICES FOR WASTEWATER SYSTEM (18-02)

ISSUE DATE: February 9, 2018

This Addendum forms a part of the Request for Quotations (RFQ) and clarifies the original Request for Quotations. Clarifications do not cancel any other portion(s) of the RFQ, including other portions of affected Sections listed below, unless otherwise noted.

The RFQ is hereby clarified as follows:

IV. SCOPE OF SERVICES

Question: Who would be responsible for the material for these repairs? There are number of sizes and types of pipe and having this material in storage would be very costly.

Answer: The Village of Islamorada will be responsible for the emergency repair materials. In cases of the non-emergency construction work, some materials and piping shall be ordered by the contractor as needed, others will be provided by the Village. Because each project is unique in nature, the requirements of the job will be discussed with the requested contractor at the time of project offer.

Question: Some of these pipe runs are under asphalt, can we get a bid item for Asphalt repair? We would need a detail for both the Village repair and the FDOT repair.

Answer: The Village will accept a bid item for a Temporary Cold Patch Asphalt Repair priced on per square foot basis.

Question: Who will the contractor be working with when it comes to shutting down the mains for these repairs? Or is the contractor responsible for the shut downs?

Answer: The Village of Islamorada Wastewater Department will be responsible for shutting down the mains for all repairs, emergency or operational. Emergency contractors may be asked to assist in shutting down Village main lines, but only under the direct supervision of the Village Supervisor on Duty, working for the Village Operations Manager or Village Manager designee.
