Re: Proposal for Data Collection & Technology Selection  
Canal #116 Plantation Key Air Curtain Restoration Project  
WSP Project: No. 600800.12

Dear Mr. Frezza:

WSP Environment & Infrastructure, Inc. (WSP) is pleased to provide this proposal for professional services related to the Canal #116 Plantation Key Backfilling Restoration Project. This proposal is based upon discussions with Village staff in continuing to meet the deliverables outlined in the Canal Work Program Chapter 28-19 Land Planning Regulations for The Florida Keys Area of Critical State Concern, Islamorada, Village of Islands.

The Village completed the design and permits for the backfill restoration and is in the process of commencing construction. This effort will be in connection with installing an air curtain to protect the canal from any potential sargassum loading.

### BACKGROUND AND NEED SECTION

Monroe County, Village of Islamorada, and the City of Marathon completed a canal restoration demonstration program back in 2014 to evaluate the effectiveness and feasibility of implementing the selected canal restoration technologies at improving water quality. The technologies were as follows:

- Backfilling;
- Weed gates and air curtains;
- Culvert Installation;
- Organic removal; and
- Aeration.

Upon installation of these technologies, FIU was contracted to develop a water quality monitoring program that compared water quality data from demonstration canals with similar canals that were not included in the restoration program. The objective of the monitoring program was to provide data needed to make unbiased, statistically rigorous statements about the status and temporal trends of water quality parameters in the remediated canals.

Based on data collected during the limited monitoring period, FIU made the following conclusion about the air curtain technology:

*The use of air curtains or weed gates appeared to be effective in reducing the amount of seaweed wrack entering into the canals; however, canals that only implemented a weed barrier as their treatment method displayed no improvement in water quality parameters.*

Using these results from the Demonstration Program along with water quality data from the Canal Management Master Plan the Village of Islamorada is moving forward with an air curtain restoration project.

The following services are following the Continuing Services Agreement dated September 2018 and amended March 2019 for Professional Engineering Services, Canal Restoration Projects, and Environmental Permitting and Support Services.

## Scope of Services

### Task 1 : Data Collection

WSP will use the bathymetric and ecological data collected under the backfill restoration project.

WSP will prepare preliminary design plans and technical specifications for the project. The preliminary design plans will consist of an existing site plan, a proposed site plan, proposed grading plans, erosion and sediment control plans, and construction details.

WSP will coordinate and hold pre-application permitting meetings with the South Florida Water Management District (SFWMD), USACE, Village, and FKNMS using the preliminary design plans. WSP will prepare meeting minutes and provide them to the Village.

WSP will update the plans and specifications in response to regulatory agency comments. WSP will prepare final design plans, technical specifications, and engineer's construction cost estimate for the project. The final design plans will include an existing site plan, proposed site plan, proposed grading plans, erosion and sediment control plans, cut/fill analysis, and construction details.

Deliverable(s): An electronic copy of the final design plans and technical specifications.

### Task 2 : Permitting

WSP will incorporate comments received during the pre-application meetings to complete and submit local, state, and federal permit applications as required, using the final design plans. Permit applications will be submitted to the following agencies:

- SFWMD;
- USACE;
- FKNMS; and
- Village.

WSP will respond to Requests for Additional Information for each permit application. If impacts to wetlands or benthic resources are identified, WSP will coordinate appropriate mitigation either onsite or through the purchase of mitigation credits.

Deliverable(s): A list of all required permits identifying issue dates and issuing authorities and electronic copies.

## Schedule

We will begin work on this project after receiving the written contract authorization. We have prepared a Preliminary Schedule outlining the major tasks of the proposed work.

The anticipated time frame for project execution is nine months with each task to be completed within the number of months indicated below from written Notice-to-Proceed (NTP):

ACTIVITY	MONTHS
Design	Two (2) Months
Permitting	Eight (8) Months

## Proposed Fee

Fees for the services described above will be charged on a Lump Sum basis. The proposed fee includes the labor and expenses that can reasonably be anticipated to complete the scope of services as proposed and includes travel costs and expendable supplies. The total proposed fee is \$32,114.40.

Task 1:	Design	\$ 22,106.40
Task 2:	Permitting	\$ 10,008.00
Total:		\$ 32,114.40

This proposal is good for 60 days or the contract end date whichever is sooner. The terms and conditions of the Non-Exclusive Continuing Services Agreement between Islamorada, Village of Islands, and WSP Environment & Infrastructure Solutions, Inc. (WSP), dated September 14, 2018, are incorporated by reference.

## Closing

We appreciate this opportunity to offer our professional services to you and the Village on this project. We look forward to working with you and are committed to providing the services you require for the successful completion of this important project within the time frame required. If you have any questions or comments regarding this proposal, please let us know.

Sincerely,

WSP USA Environment & Infrastructure, Inc.
